

## Little Sister® Private Social Network for You and Your Machines

Create private secure social networks on your terms and your style/design.

Include machines/devices with an integrated IoT Gateway!

Strong standards based end-to-end encryption for secure connections.

Novel encrypted key exchange for added security.

Communicate only with those you trust (white list) using strong identities.

Resilient peer-to-peer edge computing architecture.

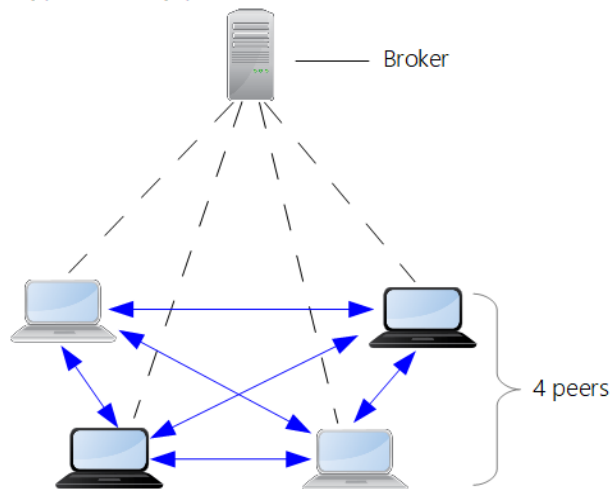

Audit and instantly control access to your data.

Create metadata manually or automatically.

Modular design with APIs, create scripts for AI and other analysis.

Single application - **Little Sister®** Windows 7/10 other OS in development.

Broker manages peer-to-peer transactions and credentials  
(all encrypted). Only peers store and send content.

**Little Sister®** is a registered EU trademark (015775869) of Lilsis AB.
