

## Little Sister® - Private Social Network for You and Your Machines

Create private secure social networks on your terms and your style/design.

Include machines/devices with an integrated IoT Gateway!

Strong standards based end-to-end encryption for secure connections.

Novel encrypted key exchange for added security.

Communicate only with those you trust (white list) using strong identities.

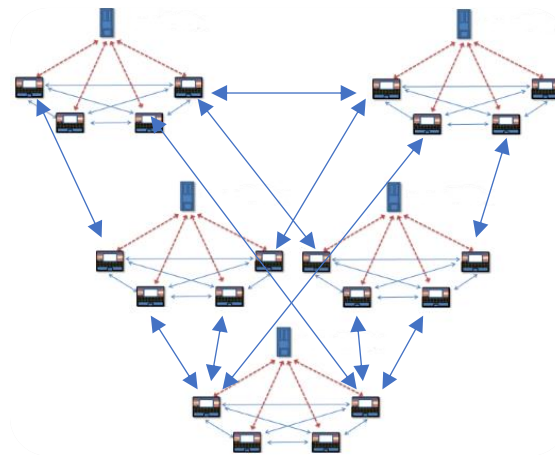

Peer-to-peer Edge computing architecture, can work without the cloud!

Audit and instantly control access to your data.

Create meta data manually or automatically.

Modular design with APIs, you can create scripts for AI and other analysis.

Single application - Little Sister® Windows 7/10 other OS in development.

Note Example only more brokers/clients possible!
